PROJECTS

Travel Management System(Backend) ▶ ⦿
Tech Stack- JAVA| Spring Boot | Hibernate | MySQL
Developed REST API for an Online Travel Management System. Customers can book Bus, Hotels or Tour Packages with their Credit Balance.

My responsibilities:
- Creating Modules and mapping them among each other
- Worked on admin and route controller and services.

Features:
- CRUD operations on Customers, Bus, Hotels and Travels.
- Booking Hotels, Travels, Bus and generate Tickets.
- Customer Feedback and Admin report.

A collaborative project executed in 6 days along with 4 other team members.

REST API Ecommerce (Backend) ⦿
Tech Stack- JAVA| Spring Boot | Hibernate | MySQL
Developed REST API for an Ecommerce website where user can perform Cart, Order, Billing and Admin dashboard operations having role authentication.

My responsibilities:
- Worked on mapping of the database, Login/sign-up authentication and order functionality.

Features:
Admin: Manage products, and orders.
User: Login/Out, Purchase Product, Payment, Track order etc.
A collaborative project executed in 4 days along with 2 other team members.

KIMAYE.COM CLONE (FRONTEND) ▶ ⦿
Tech Stack- JavaScript | HTML | CSS
Kimaye is an online fruit ordering platform. The Project is a front-end clone of the Kimaye.com itself.

My responsibilities:
- Worked on cart page to add, remove and buy products.
- Developed navigation and footer section.

Features:
- Login/out, product catalogue, add to cart, payment etc.
A collaborative project executed in 6 days along with 4 other team members.
